

*from down the street, to around the globe...* Protecting What Matters Most

Most people recognize that travel insurance is an essential part of operating in today's global marketplace. However, not all travel insurance programs are created equal. In fact, many may have conditions or exclusions that limit their ability to respond when they're most needed.

The **AHT International Travel Protection Plan** offers a comprehensive, robust and highly customizable business travel accident program.

## WHAT IT PROTECTS

The International Travel Protection Plan is designed to take the guess work out of travel and can provide protection for:

- Travel Medical
- Medical Evacuation
- Security Evacuation  
(including natural disaster)
- Accidental Death and Dismemberment
- Repatriation of Remains
- Trip Interruption
- Trip Cancellation
- Lost Personal Possessions

The International Travel Protection Plan protects almost any type of traveler including:

- Business
- Missionaries
- Nonprofit
- Leisure
- Scholastic
- Government
- Students
- Study Abroad
- Expatriate

## IF YOU WAIT UNTIL AN INCIDENT OCCURS, IT'S TOO LATE TO RESPOND EFFECTIVELY.

In today's complex global risk environment, it's increasingly essential to have plans and coverage in place before an incident occurs.

AHT's International Travel Protection Plan provides a one-stop, holistic approach to ensuring the proper protection is in place and saving cost over other models, including:

## WHY CHOOSE THIS PLAN

- 1** Buying travel insurance on a per-trip basis
- 2** Buying a standalone group travel medical program
- 3** Buying insurance for medical and security evacuations

## HOW IT WORKS

- Integrates with third-party assistance providers to provide insurance coverage for medical and security evacuations on a direct billing basis including coverage for case management fees
- Costs organizations as little as \$1 per traveler per day
- Offers membership organizations a differentiator to attract and retain members and even a possible revenue source

### STEP 1

Conduct initial meeting to understand needs

### STEP 2

Evaluate existing travel footprint, protection & population

### STEP 3

Make recommendations based on findings
