

IS CAPTIVE INSURANCE RIGHT FOR YOUR COMPANY?

As organizations of all sizes seek to gain greater control over the costs and opportunities of risk management, captive insurance continues to increase in popularity.

Having a captive insurance company gives organizations **better control over risk management and can reduce the overall cost of risk**. While captive insurance companies can be valuable strategic tools, they are not always the best approach for every organization. Well-planned captives are formed for **long-term risk management solutions**; the most successful captives are those where the parent company views the captive as a **long-term strategy**.

The world of captive insurance can be confusing, with so many different structures available, and so many different factors that need to be taken into consideration.
